

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### **Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## P R E F A C E .

---

**I**N THE following pages will be found an exposition of the now considerable vocabulary of Volapük, which will aid English-speaking people in acquiring a practical familiarity with this international language, even though they may be unacquainted with any of the foreign languages in which dictionaries of Volapük have previously been published. It is hoped that this little book may prove to be an aid in the propagation of this, the first, attempt at the introduction of a common language which has met with any noteworthy degree of success. For Volapük has obtained a footing of its own among the speakers of twenty-one different tongues, and its adherents are numbered by hundreds of thousands. The number of persons who now count Volapük among their acquirements has increased rapidly, in response to the felt want for some means of international communication which could be easily acquired, and which would express the same idea to the Swede and the African, to the German and the Chinese, to the American and the Turk, which should be free from figures of speech, and which should be logically accurate; and all this is claimed for Volapük.

The propagation of this language has recently received an impetus, due to the report to the Philological Society of London by Alexander J. Ellis, Vice-president of the Society, to whom had been referred a proposition for an international philological congress for the purpose of perfecting a universal language. He reports against such a congress, for the reason that "there already exists a universal language, Volapük, which has a large number of adherents in all countries of the world, and which is completely elaborated in grammar and vocabulary." In another part of the same report he says: "All those who desire the insubstantiation of that 'phantom of a universal language' which has flitted before so many minds from the days of the Tower of Babel, should, I think, add their voices to the many thousands who are ready to exclaim *lifomö volapük—* long live Volapük."

It is generally held that human language was, in its infancy, a Divine gift to man, and that the languages of any period are evolutions from these gifts to supply the necessities of human thought at that period, and hence that the language of a people is not only independent of the will of man, but that it is a mere expression of his necessities, and thus an indication of the progress of the mental development of the people. Volapük, however, in apparent refutation of this dictum, has evidently taken its place among the languages of the earth.

The materials from which this work has been compiled are the dictionaries—in German (latest edition) of the inventor JOHANN MARTIN SCHLEYER; in French of Prof. Kerckhoffs; in Spanish of Dr. Iparraguirre; The published writings of the makers of text-books of the language, and the highways and byways of the literature, have also been laid under contribution, so that there is herein offered, beside the words which are already included in other dictionaries, a number of words which have not previously appeared in any printed vocabulary. It is believed that every root-word in use in the language is presented, and from these can be easily made any desired number of words, if such are necessary at any time. It was ascertained by a person who made the necessary calculation that 504,440 word-forms might be made from a single active infinitive.

The inventor announced that the new language was devised for educated people, and the plan which he followed was to adopt a list of those monosyllabic root-words which were known to the greatest number of civilized persons, and then, by the use of a system of prefixes and suffixes not in use by any people to meet the prejudices of any nation or class, to denationalize the language, and provide a highly inflectional cosmopolitan language with a great wealth of root-words; a language so easily acquired that the necessary attention for this purpose becomes a pastime instead of drudgery, a language which should be systematic and capable of expressing in unmistakable terms any shade of meaning of which the human mind is capable.

English-speaking people are quite ungrateful when they voice a note of disparagement or of harsh criticism of Volapük, for it is not only nearly as much to their interest to have this language adopted generally as it would be to have the English language occupy that place, but it is much better for the whole world than English could be. Before me lies an article in Volapük "On the necessity of isolating sick persons," written by the Director of a large General Hospital in Vienna. This article proves beyond the peradventure of a doubt the adaptability of the language to scientific as well as commercial purposes, and completely refutes the criticisms of those who have alleged that it was not so adaptable. If all the irregularities of the English language could be represented by a diagram which would show the relative departures from the central idea or norm of the language, Volapük, if superposed, would be found to occupy a position very near the mean or norm, and the great contrast between its regularities and the irregularities of the English would be apparent at a glance. But English-speaking people are more numerous than those using any other language of civilization, and thus we find that the language was originally constructed with an especial reference to their needs, and that it is becoming more and more assimilated to the English—so far as new roots are concerned. That the appearance of the language reminds a linguist of the German is due to the fact that Father

Schleyer is a German, and has most frequently given us the equivalent of German word-forms. In illustration of the fact that, whether consciously or not, the language has been built up in deference to the millions of English-speaking people, it is sufficient to say that when such familiarity with the grammatical forms has been acquired as to enable one to readily isolate the root-syllable or syllables, most of the words met with would be recognized by an educated English-speaking person, either by the appearance of the word, or by the sound of the root, correctly pronounced.

The plan of this dictionary is somewhat different from any of those which have preceded it, and the changes were made with a view to increasing its utility. The idea of placing corresponding portions of the two vocabularies on the same page was obtained from the French-English dictionary of Bellows. While it is not intended that this work shall take the place of a manual of the language, it was thought best to provide the tables of the appendix in a form in which they might be carefully studied by themselves, to facilitate recognition at a glance of new words, and also to facilitate employment of properly constructed words. A number of expressions have been rendered into English and given in these pages which to many might appear superfluous in a work of this character, but they are as frequently used in some languages as many of our americanisms are used by ourselves, and they will be met with frequently in foreign correspondence. In some few instances two forms of a word are given without comment, as one was the form known and recognized for some time and the other one of recent adoption. It has frequently been the practice of the inventor to use, as a derivative, an arbitrary word-form obtained by the elision of one or more letters, sometimes of a characteristic syllable, from a regularly formed word, and it is open to question whether this should be encouraged, as in this manner Volapük is deprived of one of its greatest beauties, viz., that of regular simplicity of construction.

Volapük is not a crudity—a toy—it provides a vocabulary sufficient for the necessities of most people. It is held that this language is a better medium than any other for the expression of human thought. The almost incredible precision of the language, the great variety of its word-forms and their unequivocal signification furnish the tools with which the mind may fashion sentences which shall not only be intelligible to the immediate auditors, but be as distinctly and unmistakably intelligible to a person in the uttermost parts of the earth, by whose intellection the logogram would be interpreted in accordance with their intellectual development. This boon to mankind is the unselfish production of one who it is hoped may live to feel the gratitude graven on the hearts of those who are to profit by his labors and see it in the beautiful inscription in the "Golden Book" of humanity, upon whose pages he has richly earned a place by his free-gift to the world of this great victory of peace, forging a bond to link the hearts of the sons of men into a grand chain of union. This work bid

fair to become the handmaid of science, and bear from one worker to another the partly-completed work until the perfect ashlar is ready for its place in the wall of the new Tower upon which many may climb to the infinity.

No one could be more conscious of the short-comings of this work than the author, to whom all errors should be ascribed, for, though several kind friends have lent their aid in the difficult task of tracing through four languages and often through obscure expressions even these few words, the conversion of this flexible inflectional language into a comparatively inflexible language of particles has been done in the main by the author. To all these friends the author desires here to tender his heart-felt acknowledgments, but most of all to Col. Chas. E. Sprague, Professor and Academician, representative of the United States in the International Academy of Volapük, for his great kindness in personally supervising these sheets as they have passed through the press, and for his intelligently critical touches to the manuscript. The author will be truly grateful for voluntary criticisms and notes of errors which may be sent him in care of the publisher.

M. W. WOOD.

FORT RANDALL, DAKOTA, December 5th, 1888.

## ALPHABET.

A a Ä ä B b C c D d E e F f G g H h I i  
 J j K k L l M m N n O o Ö ö P p R r S s  
 T t U u Ü ü V v X x Y y Z z

## PRONUNCIATION.

**VOWELS.** a as in *father*; ä as in *hair*; e as in *they*; i as in *ma-*  
*chine*; o as in *go*; ö as in *word*; u as in *rude (rood)*; ü as in the German.

**CONSONANTS.** C like j in *judge*. (A vote to change this to *ck* in  
*church* has passed the Academy, but has not yet become a law.) J like *sh*.  
 Z like *ts*. S as in *sole*, but sometimes, after another consonant, softened  
 as in *rose*. The others have their usual English sounds, viz. : b, *book*;  
 d, *dog*; f, *fame*; g, *go* (not in *George*); h, *hat*; k, *keep*; l, *low*; m, *me*;  
 n, *no*; p, *pie*; r, *ray*; t, *tea*; v, *vain*; x, *box*.

Accent always on the last syllable, exclusive of the enclitics —*li* and  
 —*la*.

## REMARKS.

The part of speech to which each word belongs is not usually desig-  
 nated, as the termination in Volapük indicates it with certainty; adjectives  
 being known by the ending —*ik*, verbs by —*ön*, participles by —*öl*, ad-  
 verbs by —*o*.

Words containing any of the “vökads” ä, ö, ü, follow next after the  
 same combination of letters with the undotted a, o or u.

Words not found with the suffixes ad el am  
 may be sought under äd an, al, iel, ot.

The forms given are those of Schleyer’s Fourth Edition, but the author  
 of the passage to be translated may not yet have conformed his usage to  
 that standard.

Letters in parenthesis are sometimes omitted and sometimes inserted.

Words to which an asterisk (\*) is prefixed have been replaced by others  
 given in parenthesis, but are found in earlier writings.

The most important root-words are printed in **CAPITALS**.

## SYNOPSIS OF THE VOLAPÜK INFLECTION.

- 
1. Plural Ending -s
2. Case Endings — -a -e -i  
nominative      possessive      dative      objective.  
who?      whose?      to whom?      whom?

**Torture, to** : tomön.  
**Torturer** : tomel.  
**Toss** : jed.  
**Toss, to** : jedön.  
**Toss up, to** : susijedön.  
**Total** : suam.  
**Total** : lölik; valugik.  
**Totality** : löl; valug.  
**Totally** : löliko; lölo.  
**Tottering** : falik.  
**Touch, to** : bemufön; namön.  
**Touched** : pemufälöl.  
**Touching** : bemufam.  
**Tough** : tönik; nezadik.  
**Toughness** : tön.  
**Tour** : tüd.  
**Tourist** : tüdel.  
**Tourmaline** : tumalin.  
**Tow** : luffäg. [allü.  
**Toward** : (*prep.*) al; ä; kol; len; [allü.  
**Towel** : namaklöf; tauf.  
**Towelling** : taufastof.  
**Tower** : tüm.  
**Tower, to** : belön; tümön.  
**Town** : zif; zifil.  
**Townsmen** : sifan; zifan.  
**Toy** : pledadin.  
**Toy, mechanical** : pledavobäd.  
**Toy, to** : vanotön.  
**Trace** : veged.  
**Trace upon, to** : sumagön.  
**Track** : rut; veged; kul.

**Tractability** : yumäl; betidlöf.  
**Tractable** : dugik; yumik; betidlik.  
**Tractable, to be** : betidlön.  
**Tractableness** : yumöf.  
**Trade** : feb; namun; ted.  
**Trade, to** : detedön; tedön; setö.  
**Trader, post** : solatalinkip. [kön.  
**Tradesman** : canel; tedel.  
**Trading** : tedam.  
**Traduce, to** : slänön.  
**Traducer** : slänel.  
**Traffic** : melak.  
**Tragedy** : lügapled.  
**Tragical** : lügapledik.  
**Trail** : smaveg; veged.  
**Train** : dukod; zug; lezug.  
**Train, to** : domitön; julön; klige.  
**Train, express** : vifalezug. [lön.  
**Train, freight** : canalezug.  
**Train, rail-road** : lezug.  
**Train oil** : blöb.  
**Train up, to** : dafomön.  
**Trainer** : dlotel.  
**Training** : domit; kligelam; dlo.  
**Trait** : kaladalönug. [tam.  
**Traitor** : tlätel.  
**Traitorous** : tlätlik.  
**Trajectory** : kul.  
**Tram-car** : klautavab.  
**Tramp** : skämel.  
**Tram-rail** : klaut.  
**Tram-way** : jevalod; klautarut.  
**Tranquil** : püdik; stilik; takedik.  
**Tranquilization** : stilam.  
**Tranquilize, to** : püdön; stilön.  
**Tranquility** : stil; stiläl; takedäl.  
**Transcendental** : lovtüsienik.

**Trofik**: silly; stupid.  
**TROT**: trot; trotting.  
**Troto**: at a trot.  
**Trotön**: to trot; to go at a trot.  
**TU**: too; too much; excessively.

## GEOGRAPHICAL TERMS.

Under the resolution of the Munich Congress, which prescribes that proper names shall retain their home orthography, names of cities and towns are usually written without change. Thus, Vienna is written in the German form **Wien**, Naples in the Italian form **Napoli**, etc. Some few names of cities are included in the list, as they may be found in earlier writings. Such names are designated by an asterisk (\*). Derivatives can be easily supplied by the addition to the name of a country of the syllables —an and —ik. Thus: **Nelij**, England; **Nelijan**, an Englishman; **Nelijik**, English.

## LIST OF PREFIXES AND SUFFIXES.

The force of a syllable when prefixed or suffixed will often be best understood by a reference to the meaning of a word which is given as an example.

Words are occasionally met with in which the termination or the prefix is slightly different from that given in the Dictionary, in consequence of a few changes made by the inventor for the purpose of attaining uniformity. Thus, words designating a native of a country formerly ended in *-el*, and hence we still find *deutel* used for a German, *melopel* for an American, by certain writers.

If not found exactly as spelled, the following directions are to be observed :

Words not found under the prefix

de-	to be looked for under	dö-
va-	“ “	vä-

Words not found with the suffix

-ad	to be looked for under	-äd.
-el	“ “	-an, -al, -iel.
-am	“ “	-ot.

---

### A— VOLAPÜK PREFIXES. Da—

---

**A—**: sign of the present tense, omitted in active voice, indicative mood; sign of present time: *adelo*.

 -ut : termination for names of machines : stemut.  
 -üt : termination for names of fishes, particularly for those preserved for eating : stoküt.  
 -ved : direction toward; —wards : lomived.

## NUMERICAL DERIVATIVES.

---

This list of the suffixes, by which are formed the derivatives of the numerals, is inserted here in order that they may be the more easily memorized and because their insertion and explanation in the body of the vocabulary would have occupied too much space. A single derivative and its signification only are given. They are arranged alphabetically, as suffixes, for convenience of consultation.

- |   |   |
|---|---|
| <ul style="list-style-type: none"> <li>—<b>áb</b> : teláb; a twin.</li> <li>—<b>am</b> : folam; quadruplication.</li> <li>—<b>an</b> : lulsan; man fifty years old.</li> <li>—<b>at</b> : kilat; this three, these three.</li> <li>—<b>atiko</b> : balsetelatiko; by dozens, by twelves. [the very first of all.</li> <li>—<b>üdo</b> : balüdo; before everything,</li> <li>—<b>üf</b> : lulf; a musical fifth.</li> <li>—<b>ug</b> : kilug; triad.</li> <li>—<b>ugik</b> : balugik; united, in unity.</li> <li>—<b>ugo</b> : telugo; dually.</li> <li>—<b>ul</b> : balsul; October, tenth month.</li> <li>—<b>üm</b> : velüm; septette, chorus of seven voices. [composition.</li> <li>—<b>ümüf</b> : kilümüf; trio, a musical</li> <li>—<b>yelik</b> : telsyelik; twenty years old.</li> </ul> |
|---|---|

An "e" is often intercalated, for the sake of euphony, between the numeral stem and the suffixes which commence with consonants, as in "balsenaliko." Those words in which an "a" is found between the stem and suffix are compound words rather than derivatives.

# VOLAPÜK PARTICLES.

(RADICAL.)

## CONJUNCTIONS.

ab.	das.	jüs.	ni.	sod.	üd.
adas.	dat.	ka.	nog.	soif.	udu.
alif.	deno.	kas.	plas.	sosus.	va.
as.	do.	klu.	pläsif.	tos.	ven.
äs.	du.	ludas.	plos.	u.	ye.
bi.	ibo.	na.	segun.	ü.	yed.
biye(d).	ifi.	nag.	sis.	ud.	

Of these "deno" is also used as an adverb; "kas" is used as a prepositional conjunction; and "segun" is also used as a preposition.

## PREPOSITIONS.

a	des.	ke.	neb.	ple.	sus.
al.	dis.	klu.	nen.	plo.	ta.
äl.	dö.	ko.	neo.	plö.	to.
bevü.	du.	kol.	nes.	po.	üno.
bif.	dub.	kom.	nestü.	pos.	üntü.
bu.	edü.	lä.	öned.	sa.	ve.
bü.	fa.	len.	ove.	se.	za.
büf.	fe.	lo.	ovi.	segun.	zi.
da.	in.	lö.	ovü.	seü.	zü.
de.	ini.	ma.	pla.	sis.	
dem.	jü.	me.	plä.	su.	

## ADVERBS,

*including some which lack the characteristic termination.*

abu.	denu.	jük.	lik.	nunog.	te.
ai.	desnu.	jünu.	lisun.	ofen.	ti.
